

# Smart video made simple

## DRIVETRAIN: THE FUTURE OF VIDEO TELEMATICS

Using advanced video telematics technology is one of the best decisions a fleet manager can choose to make to help protect their assets. The right video solution can serve as an extra pair of eyes on the road, and provides valuable insights to help protect your bottom line without requiring much time or effort.

Jumpstart safety measures quickly by choosing a smart solution that is simple to integrate and use. Learn about the intelligent choice for easily improving fleet safety management and performance—the DriveTrain AI dashcam.

- ✓ Leading technology that helps to prevent avoidable incidents
- ✓ Video captures in-vehicle and external footage to help with training and exoneration
- ✓ Quality and flexibility help maximize ROI and adaptation to industry changes

## DriveTrain

**The Dashcam Designed with Fleet Managers in Mind**

A device built by the industry for the industry, the AI-12 was designed to mitigate pain-points shared by fleet managers across the globe.

This lightweight device is equipped with cutting-edge technology that collects and processes data to analyze what is happening on the road and inside the vehicle.

Engineered with our robust Machine Vision and Artificial Intelligence (MV+AI), this state-of-the-art device is the first step in advanced risk detection, and is able to surface more risk than traditional telematics technology.

The DriveTrain dashcam, powered by Lytx®, provides award-winning technology and an effective approach that has helped hundreds of thousands of drivers navigate billions of miles safely for over 20 years.

## SMART

Busy fleet managers need an easy-to-use yet intelligent solution in order to obtain detailed, accurate data to help improve safety and increase efficiency. DriveTrain dashcam uses industry-leading MV+AI to notify drivers of risky behaviors in real-time\*—it is like giving the driver a second pair of eyes on the road to help keep them protected and provide behavior awareness that enables them to develop safer driving habits. Managers are provided with a comprehensive view of their fleet, and insights to help support driver training, customer service, and overall productivity.

This smart, dual-touch approach has a significant impact on fleet.

### Advanced Technology

Proprietary MV+AI alerts drivers of distracted driving behaviors in real-time, helping them adopt better driving habits\*

### Video Evidence in an Instant

Dual-facing cameras offer accurate footage to get the full picture of an event, whether in motion or parked

### Grows with Any Fleet

Designed inside and out to be configurable and scalable to meet fleet needs today and in the future

## SIMPLE

While DriveTrain is powered by future-proof technology, it is intuitive to use. Install, configure, and retrieve valuable driver safety and trip data using our platform that is easy to navigate. The dashcam integrates seamlessly with complementary fleet management tools through an advanced API.

### Quick Install

Our user-friendly setup and interface will have you up and running in no time

### Accessible from Anywhere

No application or special software is needed since our dashcam is device neutral

### Seamless Integration

An all-inclusive API allows for easy data-retrieval from the cloud and updates

## SMART & SIMPLE

This proprietary MV+AI technology has grown and developed from the largest database of its kind, delivering precise driver behavior data that reduces the distraction of false positives. The powerful combination of real-time driver alerts and observational learning makes it easy for drivers to improve their performance and develop safer driving habits. Fewer incidents and risky driving behaviors make operations simpler for fleet managers.

The DriveTrain Dashcam is an affordable, easy-to-use dashcam with advanced technology that can be added to any fleet's telematics stack.
