

DriveTrain

Smart video made simple

DRIVETRAIN: THE FUTURE OF COLLISION PREVENTION

Using advanced video telematics technology is one of the best decisions a family can make to help protect their assets. The right video solution can serve as an extra pair of eyes on the road and provides valuable insights to help prevent collisions and correct driving behaviours.

Jump start safety quickly by choosing a smart solution that is simple to integrate and use. Learn about the intelligent choice for easily improving road safety with real-time driver alerts —the DriveTrain AI dashcam.

- ✓ Leading technology that helps to prevent avoidable incidents
- ✓ Video captures in-vehicle and external footage to help with training and exoneration
- ✓ Real-Time Alerts to assist drivers in correcting their behaviour to prevent a collision.

SMART

DriveTrain dashcam uses industry-leading MV+AI to notify drivers of risky behaviours in real-time, it is like giving the driver a second pair of eyes on the road to help keep them protected and provide behaviour awareness that enables them to develop safer driving habits. DriveTrain seamlessly connects to an online portal for easy tracking and viewing on the go.

This smart, dual-touch approach has a significant impact on safety.

Advanced Technology

Proprietary MV+AI alerts drivers of distracted driving behaviors in real-time, helping them adopt better driving habits

Video Evidence in an Instant

Dual-facing cameras offer accurate footage to get the full picture of an event, whether in motion or parked

Grows with Any Fleet

Designed inside and out to be configurable and scalable to meet your family needs today and in the future

SIMPLE

While DriveTrain is powered by future-proof technology, it is intuitive to use. Install, configure, and retrieve valuable driver safety and trip data using our platform that is easy to navigate.

Quick Install

Our user-friendly setup and interface will have you up and running in no time

Accessible from Anywhere

No application or special software is needed since our dashcam is device neutral

Seamless Integration

An all-inclusive API allows for easy data retrieval from the cloud and updates

SMART & SIMPLE

This proprietary MV+AI technology has grown and developed from the largest database of its kind, delivering precise driver behaviour data that reduces the distraction of false positives. The powerful combination of real-time driver alerts and observational learning makes it easy for drivers to improve their performance and develop safer driving habits. Fewer incidents and risky driving behaviours make operations simpler for fleet managers.

The DriveTrain Dashcam is an affordable, easy-to-use dashcam with advanced technology including Artificial Intelligence and Machine Vision.

DriveTrain

Detect Risky Driving Behaviours

COLLISION DETECTION

CELLPHONE DETECTION

DISTRACTED DRIVING

DRIVER SMOKING

DRIVER UNBELTED

Engineered with our robust Machine Vision and Artificial Intelligence (MV+AI), this state-of-the-art device is the first step in advanced risk detection, and is able to surface more risk than traditional telematics technology.

The DriveTrain dashcam, powered by Lytx®, provides award winning technology and an effective approach that has helped hundreds of thousands of drivers navigate billions of miles safely for over 20 years.
